

Chromakey Paint - Ultimatte Paint - DigiComp Paint - Video Keying Paint

Rosco's Chromakey and Ultimatte paints have been specifically formulated to provide the necessary luminance values and color saturation required for video keying effects. The vinyl acrylic paints can be used on most surfaces and applied by brush, roller, or sprayer. Paint coverage is approximately 300 square feet per gallon of paint onto a primed surface.

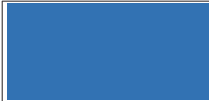

Chromakey and Ultimatte are different brands of electronic video "keying" systems. Choose the paint appropriate to your equipment or software and the color appropriate to the subject in front of the color.

DigiComp blue and green colors are specifically formulated for keying effects in film, video, and digital applications. DigiComp color standards are precisely manufactured for clean separation with little or no post production "touch-up" needed. Available as vinyl acrylic paint, gaffers tape, and 59" wide fabric. All exactly the same color.

In addition to these paints, we can provide fabrics, flooring, and custom sewn backdrops in Chromakey and digital blue and green colors.

Colors shown below are simulated. Sample cards showing the actual paint colors, technical specifications, and installation instructions are available on request.

Important Information about Prices and Shipping

PRICES:

Please contact us for prices and shipping cost.

ORDERING:

Orders can be placed by phone, fax, or email. On-line ordering is not available. See below for contact information.

AVAILABILITY:

The one gallon size of Chromakey and Ultimatte blue and green paint is normally available from our Baltimore, MD location. Large quantities of keying paint, DigiComp products, Ultimatte Super Blue, and all 5 gallon sizes are drop-shipped from the factory warehouses in Stamford, CT or California.

SHIPPING:

Special cartons with inserts are required to successfully ship gallons of paint by UPS. There is a packaging charge of \$ 3.00 for each 2 gallon carton and \$ 6.00 for each 4 gallon carton. There is no 1 gallon carton. These charges will be added to the shipping cost of your order. Large quantities of paint can be shipped by common carrier truck service on pallets without the use of the special cartons.

The 5 gallon pails of paint are drop shipped from the factory warehouses without using special cartons. They usually survive shipment by UPS, so the factory does not have special cartons.

A drop-ship charge of \$ 8.00 applies to each order if it is shipped from the manufacturer. The manufacturer has a warehouse in Connecticut and a warehouse in California.

July 2015. Paint and shipping prices have increased. Please contact us for current prices.
