## Outdoor Ellipsoidal Spots:

These are fully functional outdoor ellipsoidal framing spots. Rated IP65 for outdoor use, and can be used indoors as well. Used for architectural lighting, outdoor sculpture lighting, and gobo pattern projection of logos and images. Zoom focus light beam, framing shutters, gobo slot for glass or steel gobo patterns, and internal holder for color filters. The removable lid allows for maximum accessibility during installation, lamp changes, or lens adjustments. The lid is secured to the body with 4 side mounted link-lock latches producing a water tight seal. Padlocks of appropriate size can be attached to the locks for security. Two stainless steel safety cables hold the lid securely when the lid is open. Cable entry glands on bottom of housing for permanent power wiring (by others).

Several mounting options to support the spot light from walls, vertical poles, on top a a10" high pedestal, and hanging yoke with cradle. An included pan and tilt head can attach to the mounts for flexible aiming and secure locking into position.

These ODEC spots use a CDM (ceramic metal halide) enclosed arc lamp inside an ellipsoidal reflector instead of a tungsten halogen lamp. CDM lamp has 12,000 hr. life. Models for use with 39, 70, or 150 watt CDM lamp. CDM lamp is **not dimmable** and requires a warm-up time to reach full brightness. CDM lamp is not included with the fixture. An electronic power supply for lamp is mounted internally along with an on/off power switch to disconnect the fixture from power during maintenance. Power is 120 vac standard with 240 vac and 277 vac optional. UL and CUL listed for wet locations. Altman Brand.

Includes black internal color frame, pan/tilt head, black safety cable, pattern holder, and 12' power cord with bare ends. Price includes power supply for 150 watt CDM lamp (not included). For use with 39 watt or 70 watt CDM lamps, replace -150 in part number with 39 or 70. Black is standard. For white or silver housing, replace B at end of catalog number with W = white or S = silver.

## ODEC Outdoor Ellipsoidal Spot:

Full size model with two zoom ranges of 15° to 35° and 30° to 55° field angles for distances up to 80 feet. Color frame accepts glass 6" dia glass filters or plastic sheet filters. Pattern holder accepts up to 1 B size glass or 2 B size steel patterns. External clips on outside front of housing for 7-1/2" x 7-1/2" accessories (color frame, snoot, color scroller, etc.). A metal donut that fits inside at the front is included to sharpen image. Black is standard. For white or silver housing, replace B at end of catalog number with W = white or S = silver.
