**LED Work Light:**

The Altman LED work light is ecological choice for general work lighting in any size theatre space. A 130 watt led source provides 10,000 lumens of light in 3000K for a true tungsten look and feel, so the work lighting will be the same color temp as the performance lighting. Also available as 5000K color temp. Convection cooled (no fans). Includes a filter frame for use with diffusion and color filters, an asymmetrical reflector for an even wide light field, a safety cable, and a #510 c-clamp. Non-dim, only for on/off applications controlled by external switch or breaker. Power supply rated for 110-277 vac. Cable is 5' with no plug. Housing is standard black, with optional white or silver finish (specify when ordering) at same price. Aprox. dimensions are 14.6" wide by 8.0" high by 6" deep including yoke. Weight is approx. 12 lbs..
