### Spectra LED Blacklights:

The Spectra series of LED Blacklights use high performance, long life UV-A (365nm) LED emitters. Less visible light than traditional blacklights. DMX-512 control in/thru using 5-pin XLR connectors. RDM compliant. Control panel with multiple on-board control options of dimming, strobe, master/slave, and manual intensity control. Dimming engine has up to 16 bit fading accuracy for high quality fades. Internal power supply is self-adjusting for 100 V to 240 V 50/60 Hz.. Altman brand.

Professional quality for architectural, display, events, theme parks, and theatrical applications.

### Spectra SS-UV30 LED Blacklight:

Three LED pods on independent DMX channels for individual intensity control. The pods can be individually focused and the interchangeable yoke allows for vertical or horizontal alignment. Each pod has 4 LED emitters totaling 10 watts. Choice of lens options of 10°, 30° or 60° beam spread. DMX receptacles for in/thru DMX signal and PowerCon receptacles for in/thru of AC power between units. Includes safety cable and a 5' power cord with Edison male and PowerCon connector to attach to fixture. Only color is black. ETL and cETL listed for indoor use only. When ordering, specify beam spread \* at end of catalog number: -10 = 10°, -30 = 30°, or -60 = 60°.
